Multi-purpose grease

Description

Castrol Spheerol™ LCX 222 is a premium lithium complex, extreme pressure grease intended for industrial or construction applications. Based on high quality mineral oils, Spheerol LCX grease is formulated to provide excellent high temperature performance with excellent adhesion, structural stability and resistance to water.

The grease has a high level of chemical stability and offer excellent protection against rust, corrosion and wear, especially on axles, rings and bearings. The operating temperature range is -20°C to + 140°C

Application

Spheerol LCX 222 is a NLGI 2 grade heavy duty grease, recommended for industrial bearings in severe applications and provide protection against:

- Shocks and vibrations
- Water washout, water ingress
- Corrosive environment, as in mill applications

Advantages

Spheerol LCX 222 offers the following benefits:

- Reduced downtime and maintenance costs because of high level of protection against wear, corrosion and oxidation combined with an exceptional degree of rust protection against acidic water.
- High anti-wear and extreme pressure performance to be suitable for a wide range of bearing speeds.
- Extended intervals between re-lubrication due to long product life even under severe operating conditions.
- Excellent resistance to water washout.
